

Remarks

The Applicant thanks the Examiner for conducting a telephone interview with the Applicant's representative on May 1, 2008 wherein the Examiner and the Applicant's representative agreed upon amendments that would overcome the minor formal objections to the application.

The Specification is objected to as failing to provide antecedent basis for the claimed subject matter; in particular, the prehension zone. As discussed during the interview, it is respectfully submitted that the Specification discloses the prehension zone. The claimed prehension zone is recited in the originally-filed application at least in paragraphs [0018], [0040], [0043], [0082], [0083] and [0099]. In addition, the prehension zone is labeled as element 8 in the figures. Based on the foregoing, reconsideration and withdrawal of the objection to the Specification is respectfully requested.

Claims 19, 21-23, 25-27, 30-31 and 33-37 are objected to but would be allowable if amended to correct minor formalities. Independent Claim 19 has been amended to clarify that the package is being modified and to provide antecedent basis for the claimed "shoulders." In addition, as discussed during the interview, Claim 19 now recites that the hollow portion is in communication with the cylindrical cavity to correct the issue with use of the word "empty." Support for this amendment is found, at least, in Fig. 1. No new matter is entered by these amendments. Based on the foregoing, reconsideration and withdrawal of the objection to the claims is respectfully requested.

Finally, as discussed during the interview, the Applicant submits that formal drawings will be provided within the allotted time after a Notice of Allowance is issued.

In light of the foregoing, the Applicant respectfully submits that the entire application is now in condition for allowance, which is respectfully requested. As discussed during the interview, if there are any additional formalities that need to be corrected, the Applicant respectfully requests that

the Examiner call the Applicant's representative to address these formalities in an Examiner's amendment.

Respectfully submitted,

T. Daniel Christenbury
